**SUSTAINABILITY
CERTIFICATIONS**

The concrete commitment to the environment has always identified Pival's chain. The processing waste is turned into biomass to produce 100% of the heating and the energy for the drying process. A solar panel system produces clean energy. All products are made using environmentally friendly materials and manufacturing processes. The compounds used are not harmful to the health and the varnish cycle is strictly water-based, a choice adopted over 15 years ago.

L'impegno concreto per l'ambiente identifica da sempre i processi produttivi Pival. La biomassa ricavata dagli scarti di lavorazione garantisce il 100% del fabbisogno di riscaldamento e il funzionamento dell'impianto di essiccazione. Il sistema fotovoltaico fornisce energia pulita. I prodotti sono realizzati con materiali e processi di lavorazione eco-compatibili. Vengono utilizzati composti non dannosi per la salute e il ciclo di verniciatura è rigorosamente all'acqua, una scelta adottata da oltre 15 anni.
